

Esker Signs AP Automation Deal Worth Over \$520,000 with American Soft Drink Producer

Esker selected out of 15+ vendors to automate beverage company's accounts payable operations in a multi-instance SAP® environment

Derby, UK — November 14, 2013 — [Esker](#), a worldwide leader in [document process automation solutions](#) and [SAP®](#) software solution and technology partner, today announced that a leading beverage producer has signed on to automate the processing of its vendor invoices. The company will leverage Esker's on-premises [Accounts Payable](#) solution to achieve a single, unified workflow process within multiple applications of SAP.

After previously relying on business process outsourcing (BPO) to manage its monthly volume of 50,000 vendor invoices, the company initiated a plan to restructure its accounts payable (AP) operations back to an in-house processing model. Driving this project was the company's goal to eliminate a variety of AP-related issues they were experiencing. Top priorities included: the elimination of duplicate invoices, gaining visibility into what stage an invoice is at in the approval process, and eliminating a number of charges being billed by the third party when invoices required multiple manual touch points.

Recognising Esker's vast experience with AP customers in an SAP environment, the soft drink producer selected Esker's SAP-integrated automation solution to centralise its AP operations. Using an "agile" approach to solution delivery, Esker was able to ensure rapid implementation — a key factor in the decision-making process. The company anticipates a wide range of benefits as a result of its partnership with Esker, including accelerated invoice processing and approval times, improved control and oversight, and reduced payment errors.

"This is a great example of how automation can be used to maximise current SAP investments while consolidating AP operations on a large scale," said Steve Smith, U.S. Chief Operating Officer at Esker. "We're excited about the opportunity to help this company achieve its improvement goals within AP and potentially beyond."

[About Esker](#)

Esker is the worldwide leader in document process automation solutions. Addressing all types of business processes from accounts payable and accounts receivable to sales order processing and procurement, Esker cloud computing solutions enable companies to automate the reception, processing and sending of any business document with one platform. Esker helps over 80,000 companies across the world to reduce the use of paper and eliminate manual processes while improving their productivity, efficiency and environmental impact.
